## **About Check-Cap**

Check-Cap is advancing the development of the C-Scan® System, the first and only preparation-free ingestible scanning capsule-based system for the prevention of colorectal cancer (CRC) through the detection of precancerous polyps. The patient-friendly test has the potential to increase screening adherence and reduce the overall incidence of CRC. The C-Scan System utilizes an ultra-low dose X-ray capsule, an integrated positioning, control, and recording system, as well as proprietary software to generate a 3D map of the inner lining of the colon. The C-Scan System is non-invasive and requires no preparation or sedation, allowing patients to continue their daily routine with no interruption as the capsule is propelled through the gastrointestinal tract by natural motility.
